

NATHAN COLPRON

Full Stack Developer & AI Integrator

Kitchener, Ontario, Canada ncolpron@gmail.com (226) 978-9390

linkedin.com/in/nathan-colpron-045181185 github.com/Cartman37 Cartman37.github.io

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and DevOps specialist with 7+ years of experience designing, building, and scaling enterprise web solutions, shipping logistics systems, and database architectures. Combines deep expertise in traditional web development with cutting-edge AI orchestration capabilities. Proven track record in engineering custom ERPs, invoicing pipelines, inventory logistics, and API networks. Passionate about leveraging AI paradigms to supercharge development workflows and maximize organizational efficiency.

TECHNICAL SKILLS

Backend & Database

PHP
Laravel
Java
SQL Server
MySQL
Redis
REST APIs
SOAP APIs

Frontend & Web Development

Vue.js
Vite
JavaScript
HTML5
CSS3
Responsive Design
Web Applications

AI & Automation

Edge LLMs
Local AI Inference
Prompt Engineering
Agentic Workflows
CodeRabbit
GitLab CI/CD
CLI Tooling

Systems & DevOps

- System Administration
- Version Control (Git)
- PHPStorm
- VS Code
- Computer Networking
- Test Automation
- Software Testing

PROFESSIONAL EXPERIENCE

Full Stack Developer Sep 2019 - Present

Cober Solutions

Kitchener, ON (Remote)

- Engineered and scaled core print-manufacturing internal software for automated ordering, shipping logistics, inventory controls, invoicing, and real-time operational analytics
- Designed robust REST/SOAP API pipelines for seamless third-party client integrations
- Optimized performance across MySQL and SQL Server databases
- Orchestrated Redis job queues to process high-volume batch tasks efficiently

Technologies:

Laravel Vue.js Redis MySQL SQL Server SOAP/REST APIs System Admin

Full Stack Developer & Design/Sales Associate Jan 2014 - Aug 2019

Freure Homes

Kitchener, ON

- Managed interior/exterior designs and client sales operations
- Initiated, pitched, and developed a comprehensive property management system for the business
- Designed and deployed system in collaboration with Conestoga College as a capstone software project

Technologies:

PHP MySQL JavaScript HTML/CSS Client Relations

Pharmacy Technician Jan 2013 - Nov 2013

Shoppers Drug Mart

Ontario, Canada

- Managed prescription processing, inventory control, and detailed verification audits
- Operated in a high-accuracy, fast-paced retail environment

FEATURED PROJECTS

Enterprise ERP & Logistics System 2019 - Present

Full-scale internal enterprise tool designed for print-industry clients. Manages end-to-end print job batching, complex invoicing rules, automated shipping calculations, and inventory forecasting with real-time operational analytics.

Laravel MySQL Redis APIs

Proprietary

Property Management Portal

2018 - 2019

Comprehensive property management system designed in partnership with Conestoga College. Features tenant application processing, maintenance tracking, rent collection schedules, and secure administrative dashboards.

PHP MySQL JavaScript Bootstrap

[GitHub Repository](#)

Local AI Inference Setup

2023 - Present

Personal orchestration scripts for local edge LLMs using Llama.cpp and custom model loading wrappers. Optimized for processing codebases offline, increasing privacy and speed while eliminating cloud token overhead.

Python Local LLMs Inference Llama.cpp

Developer Sandbox

EDUCATION

Conestoga College

2018 - 2019

Advanced Diploma, Computer Programming

Dean's Honour List With Distinction

Grade: 3.8 GPA. Completed rigorous courses in data structures, systems analysis, databases, and network architectures.

McMaster University

2008 - 2013

Bachelor of Technology (BTech), Biotechnology

Studied bioprocess engineering, bioinformatics, organic chemistry, and industrial automation protocols. Developed advanced analytical thinking and data parsing techniques.

AI & DEVELOPER EFFICIENCY EXPERTISE

Local & Edge AI

- Deploy quantized open-weights models locally for secure processing of sensitive proprietary database schemas
- Optimize inference engines to run efficiently on workstation hardware, saving significant SaaS API subscription fees
- Eliminate recurring cloud token overhead while maintaining high performance standards

Agentic Developer Tooling

- Utilize state-of-the-art tools (Claude, Codex, Gemini, Agentic CLIs) to rapidly draft, refactor, and audit logic
- Integrate GitLab pipelines, PHPStorm inspections, and automated PR review loops via CodeRabbit
- Accelerate development cycles through autonomous agentic software and rigorous validation pipelines

KEY STRENGTHS

- Self-Starter & Fast Learner:** Thrive on diving deep into new technologies, whether that means custom Redis caching schemas or local edge model runtimes.
- Collaborative Leader:** Proven experience working closely with cross-functional teams, college partnerships, and key business stakeholders to align code architectures with operational goals.
- Problem Solver:** Expertise in aligning code architectures with operational goals to maximize efficiency and organizational effectiveness.
- Innovation-Driven:** Passionate about leveraging the latest AI paradigms to supercharge development workflows and maximize productivity.

CERTIFICATIONS & ACHIEVEMENTS

- Dean's Honour List - Conestoga College (2018-2019)
 - Graduated With Distinction - Computer Programming Program
 - 3.8 GPA - Academic Excellence Recognition
-

Open to new opportunities in Full Stack Development, AI Integration, DevOps, and Systems Engineering
